

COVID-19 Checklist

- Our office is privileged to be part of a small scientific community that has a research panel to keep us abreast of the most current effective dental and disinfection protocols. Some of what we do is not common knowledge, yet we have implemented it and our patient family benefits from this
- Extra communication to ensure patients understand our new protocols
- Appointments have been adjusted to permit extra time between appointments to avoid overlap and potential patient contact with other patients
- This extra time permits additional time for treatment room cleaning and disinfection
- Pre-appointment Screening (Questionnaire)
- Pts will wait in their cars and we will acknowledge you are here
- Screening will be reviewed again along with temperature and S02 measurement
- Pts will be escorted into the office directly to the treatment room. They will also be asked to wash their hands prior to and at the end of their appointment
- Guests and drivers will be asked to remain in their car
- The office has under gone a deep cleaning and uncluttering to remove potential sources of contamination
- Reception Chairs (should they be used) are spaced to allow for social distancing
- Everybody; Patients, Staff or anyone else will be required to wear masks
- No couriers, mail personnel, lab deliveries will be allowed to enter the office or come into contact with patient or staff. Deliveries will be dropped off in the vestibule
- Every effort will be made to prevent any patient contact with other individuals not related to staff wearing appropriate PPE
- ActivePure technology developed by NASA and used in the International Space Station is being used to sanitize the air and all office surfaces
- New technology has been purchased to create custom, on-site sanitizer
- Office management software enables virtual paperless office systems
